Dear Parents,

### Parent Education Programmes for Non-Chinese Speaking Parents

The Government is committed to enhancing the Chinese proficiency of NCS students to prepare them for further studies and work, as well as integration into the local community. In the course of learning Chinese, while it requires the continuous effort of schools, teachers and NSC students, support from families, such as creating an environment conducive to the learning of Chinese, is also needed.

EDB provided a series of parent education programmes for NCS parents in the 2020/21 school year, including parent education talks cum exhibitions and community activities, to help them understand that they need to let their children have exposure to and learn Chinese as early as possible, understand the multiple pathways available to their children and strengthen communication with schools so as to support the learning of their children. To support more NCS parents, the EDB will continue to provide relevant parent education programmes in the 2021/22 school year and introduce a series of activities progressively starting from mid November 2021.

For enrolment methods, programme details and other information, please refer to the following:
